PROFILE

Artificial Intelligence and Machine Learning undergraduate with a CGPA of 9.24 and strong foundations in Python, Data Structures, Algorithms, OOP, DBMS, and Machine Learning. Experienced in developing AI-based projects and working with real-world datasets. Seeking Full-Time opportunities in AI/ML, Data Science, Software Development, or Data Analytics to apply technical and analytical skills in practical environments.

EDUCATION

B. Tech in Artificial Intelligence and Machine Learning

Expected Graduation: Apr 2027

Vignan Institute of Technology and Science, Hyderabad

CGPA: 9.3

Diploma in Civil Engineering

Graduated: Apr 2024

Government Polytechnic for Women, Peddakodur

CGPA: 9.6 / 10.0

Secondary School Education (SSC)

Graduated: May 2021

Zilla Parishad High School, Parlapalli

CGPA: 10.0 / 10.0

TECHNICAL SKILLS

- **Programming:** Python, Java, C
- **Machine Learning:** Supervised Learning, Classification, Regression
- **Core CS Fundamentals:** Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Computer Networks, Database Management Systems (DBMS)
- **Databases:** MySQL
- **Tools:** Git, GitHub

RELEVANT EXPERIENCE

Machine Learning Workshop | Innomatics Research Labs

Oct 2025

- Processed and analyzed 5+ real-world datasets using Python and Pandas.
- Built and evaluated machine learning models achieving 80%+ prediction accuracy.
- Performed feature engineering on 1,000+ records to improve model performance.

Hack Vibe | College Hackathon Participant

Sep 2025

- Created an AI-powered solution using Python during a 24-hour hackathon.
- Collaborated with a 4-member team to deliver a working prototype within the event timeline.
- Presented the prototype to judges, demonstrating its practical applications and technical capabilities.

PROJECTS

Smart Shop AI | Python

- Engineered a product suggestion system based on user preferences and requirements.
- Designed intelligent decision-making logic to generate personalized shopping insights.
- Enhanced product discovery by providing relevant and user-centric recommendations.

Encrypted Messaging System

- Built a secure messaging application using encryption and decryption techniques.
- Enabled protected communication through end-to-end security mechanisms.
- Strengthened data privacy by preventing unauthorized access to transmitted information.

CERTIFICATES

- NPTEL – Data Analytics With Python
- NPTEL – Programming in Java
- Infosys Springboard – Machine Learning Fundamentals
- NASSCOM – Gen AI Tools
- NASSCOM – Digital Edges 101
